

Examining Social Presence In A Professional Online Conference

Luisa F. Castro, Ph.D.

22nd Teaching Colleges and Community Online Conference

April 18, 2017

Who Am I?

I'm a recent doctoral graduate from the Learning Design and Technology Department at the University of Hawaii at Manoa and the new statewide Hawaii Agricultural Food Safety Program Manager.

Agenda

Online Conference Series
produced by Smithsonian Education

Introduction

WINTER 2017
ART ED NOW
NATIONAL ONLINE CONFERENCE
for Art Teachers

Presented by theartofed.com

February 18, 2017

GLOBALCON: CONNECTING EDUCATORS AND ORGANIZATIONS WORLDWIDE

Introduction

Professional online conferences...

- interchange of ideas, talking and networking with colleagues, and sharing and learning
- run on a real time schedule over a defined period of time,
- interaction and a community of learning.

Social Presence theory

John Short, Ederyn Williams & Bruce Christie – 1976

Technology mediating your
interaction with Bob

Introduction

What is Social Presence?

Introduction

What is Social Presence?

- the degree to which a person is perceived as a **'real person' in computer mediated communication.**

Without presenters and attendees being physically at the venue, or being able to stroll through the poster rooms and attend the sessions,

Without presenters and attendees being physically at the venue, or being able to stroll through the poster rooms and attend the sessions,

how do they construct and convey social presence in a professional online conference?

Introduction

The purpose of this mixed-method, multiple case study was to examine how participants manifest their social presence in a professional online conference.

Research Questions

Research Question 1: How is social presence manifested in the volume and patterns of interaction in a professional online conference?

Research Question 2: How do attendees and presenters perceive social presence in a professional online conference?

Research Question 3: How does social presence influence the conference experience of attendees and presenters in a professional online conference?

Research Questions

Research Question 1: How is social presence manifested in the volume and patterns of interaction in a professional online conference?

Research Question 2: How do attendees and presenters perceive social presence in a professional online conference?

Research Question 3: How does social presence influence the conference experience of attendees and presenters in a professional online conference?

Aloha!

The 21st Annual TCC Worldwide Online Conference: April 19-21, 2016

TCC, Technology, Colleges and Community, is a worldwide online conference attended by university and college personnel including faculty, academic support staff, counselors, student services personnel, students, and administrators.

Join our 21st edition of this annual event to share your expertise, experiences, and knowledge relevant to the use of information technology in learning, teaching, innovation, and academic services. This event is very helpful and “friendly” to novices. It provides you with a strong foundation about teaching and learning with modern technology.

We have unlimited site licenses for group, campus and related institutional participants.

68 [REDACTED] 7:38 AM
Edmodo is free also for private schools.

69 [REDACTED] 7:39 AM
At my school, classes are 7-8 weeks or 10 weeks. I don't use social media to connect with students since we have a build in system for maintaining personal contact and announcements that can act as reminders, summaries, alerts.

70 [REDACTED] 7:39 AM
Blooms is

71 [REDACTED] 7:40 AM
Sorry. Bloomz is a resource my son,s teacher uses. It's great!

72 [REDACTED] 7:40 AM
Are there any thoughts/concerns about boundary issues with instructors/students using social media? I'm thinking about potential for in [REDACTED] private behavior/relationships developing.

73 [REDACTED] 7:41 AM
Yes. I used it in a private school.

74 [REDACTED] 7:41 AM
I don't encourage students to Friend me on FaceBook - it is MY outlet! But, I have accepted a handful of requests.

75 [REDACTED] 7:41 AM
[REDACTED] --my colleagues who have used social media create separate accounts that are "just" for students; they do not share their personal accounts.

76 [REDACTED] 7:41 AM
Oh, [REDACTED] my mind is going 100 miles an hour now. You rock!

77 [REDACTED] 7:42 AM
Yes, me.

78 [REDACTED] 7:42 AM

Social Presence of Attendees In 6 Sessions

Community	Knowledge & Experience	Affective	Interaction	Presenter
Vocatives (27)	Personal (19)	Paralanguage (83)	Compliments (142)	Reference to Presenter (22)

				22

Social Presence Indicators

Compliments or Agreement (142)

Compliments others or agrees with the contents of others' messages.

01

Feedback/Answer (120)

Response or reaction to another chat post.

02

Paralanguage (83)

Features text to convey emotion (e.g., emoticons, excessive exclamation, and ALL CAPS).

03

Appreciation (71)

Expresses "Thank you" to acknowledge the presenters and other attendees.

04

Social Presence of Attendees

Total Affective Association Responses

■ Paralinguage

■ Humor or sarcasm

■ Self-Disclosure

■ Emotion

[;-)] LOL

YES!!!

Social Presence of Attendees

Total Community Cohesion Responses

- Vocatives
- Offers Help
- Greetings or Salutations
- Group References
- Social Sharing

I just sent you that link in the chat box.

Thanks Lisa!

Social Presence of Attendees

Total Interaction Intensity Responses

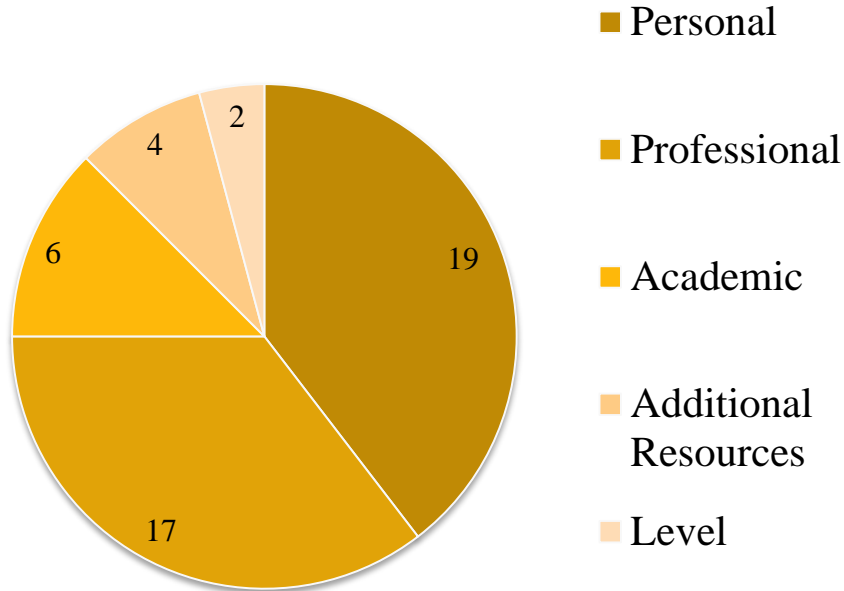

Great job. Thanks
for the info.

To answer your
question...

Social Presence of Attendees

Total Knowledge and Experience Responses

My K-12 training has helped me to help undergraduates

I personally don't like Facebook

Social Presence of Attendees

Total Presenter Involvement Responses

- Reference to Presenter
- Response to attendee
- Session Contribution
- Digression
- Instructions
- Redirect

Trisha, your feedback is so natural and personal.

Great slides and I appreciate the book you recommended

Social Presence of Attendees

Case	Total Chat Posts	SP Indicators	SP Density
A	26	25	96
B	194	206	106
C	70	174	249
D	69	80	116
E	81	90	111
F*	68	77	113

Social Presence of Presenters

CASE A (SPD 96)

DELIVERY

Moderate paced

AFFECTIVE

Very little personal disclosure and instances of emotion

INTERACTION

Used polling but did not post results. Showed appreciation

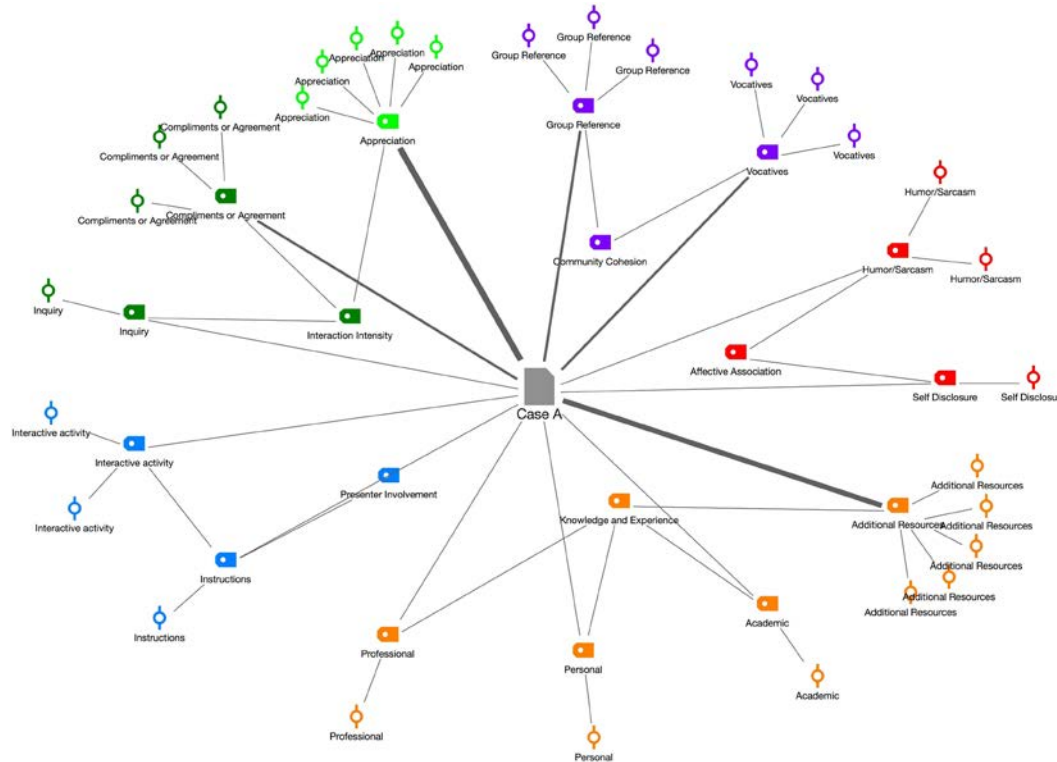

MONITORING CHAT BOX

No manifestations of acknowledgement or feedback

ADDITIONAL RESOURCES

Provided some links to URLs and publications

Social Presence of Presenters

CASE B (SPD of 106)

DELIVERY

Fast paced, dynamic, visual presentation

AFFECTIVE

Personal and enthusiastic

INTERACTION

High participation with attendees, using guessing games

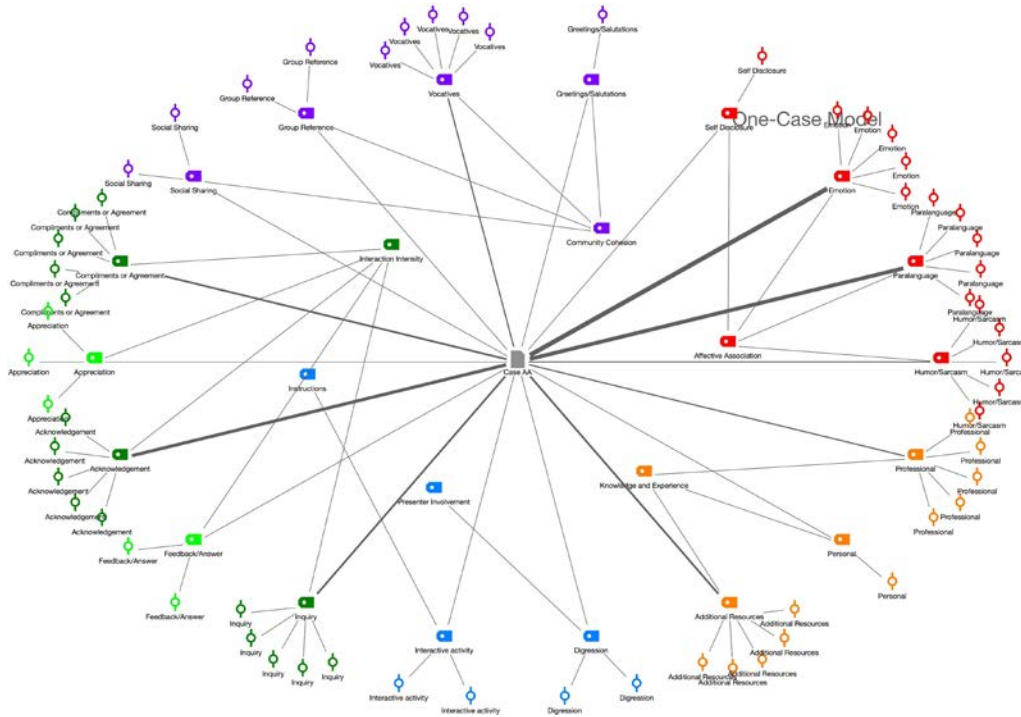

MONITORING CHAT BOX

Immediate response to attendee posts in chat box

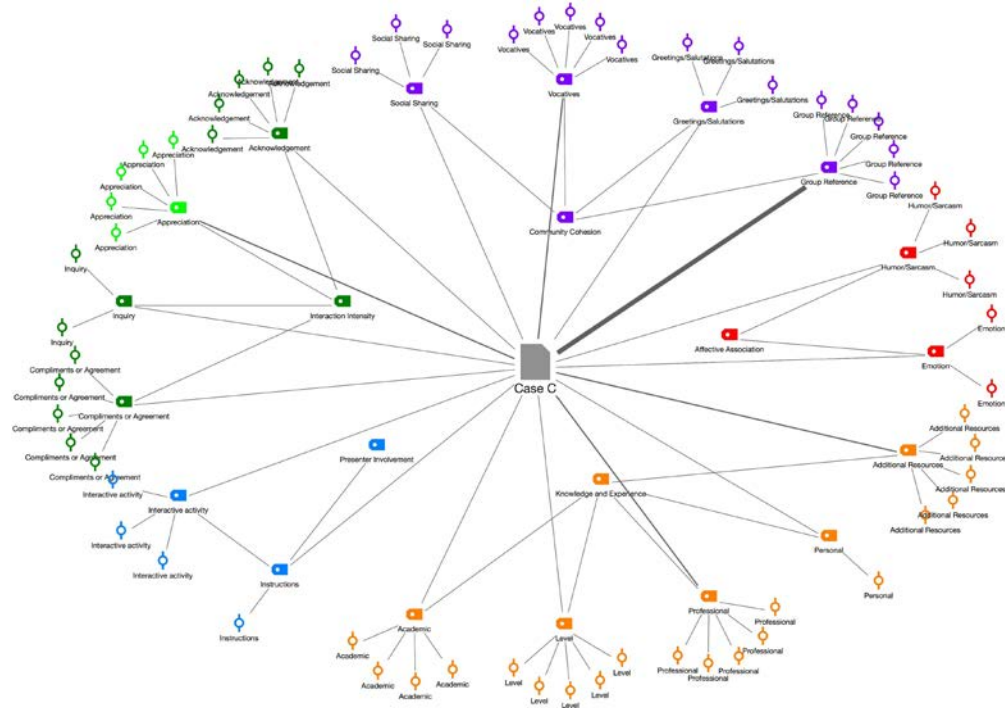

ADDITIONAL RESOURCES

Provided multiple links to URLs and publications

Social Presence of Presenters

CASE C (SPD of 249)

COMMUNITY

Highest levels of creating a sense of community

AFFECTIVE

More formal and academic

INTERACTION

High acknowledgement of attendees.

MONITORING CHAT BOX

Absence of co-presenter assistance

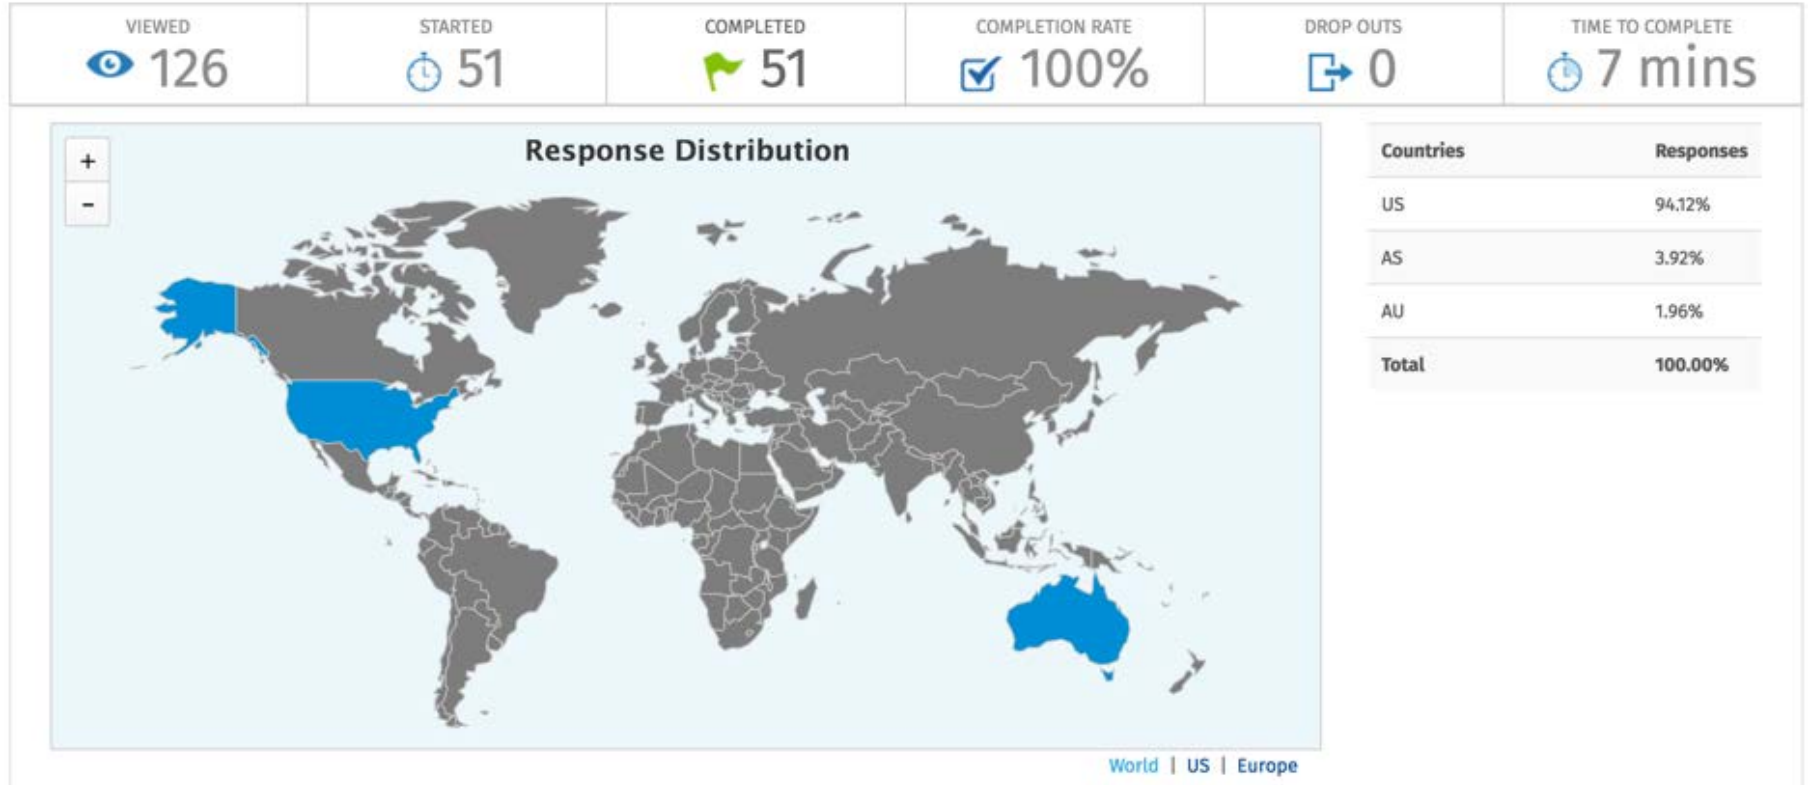

ADDITIONAL RESOURCES

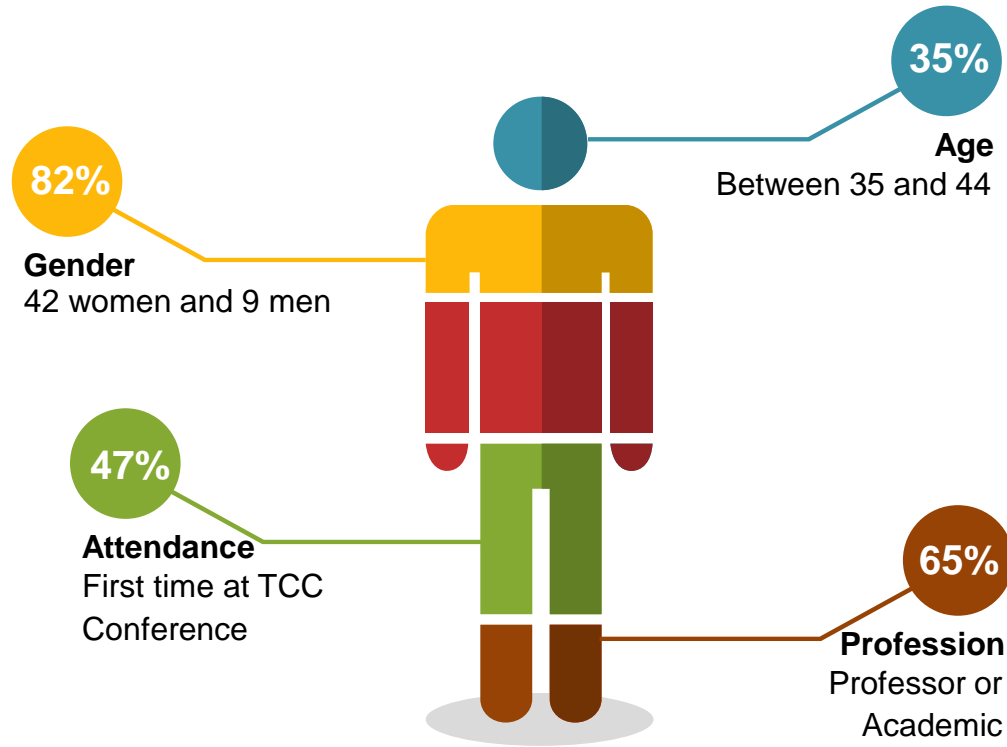

Shared professional, academic, personal backgrounds

Research Question 2: How do attendees and presenters perceive social presence in a professional online conference?

Questionnaire

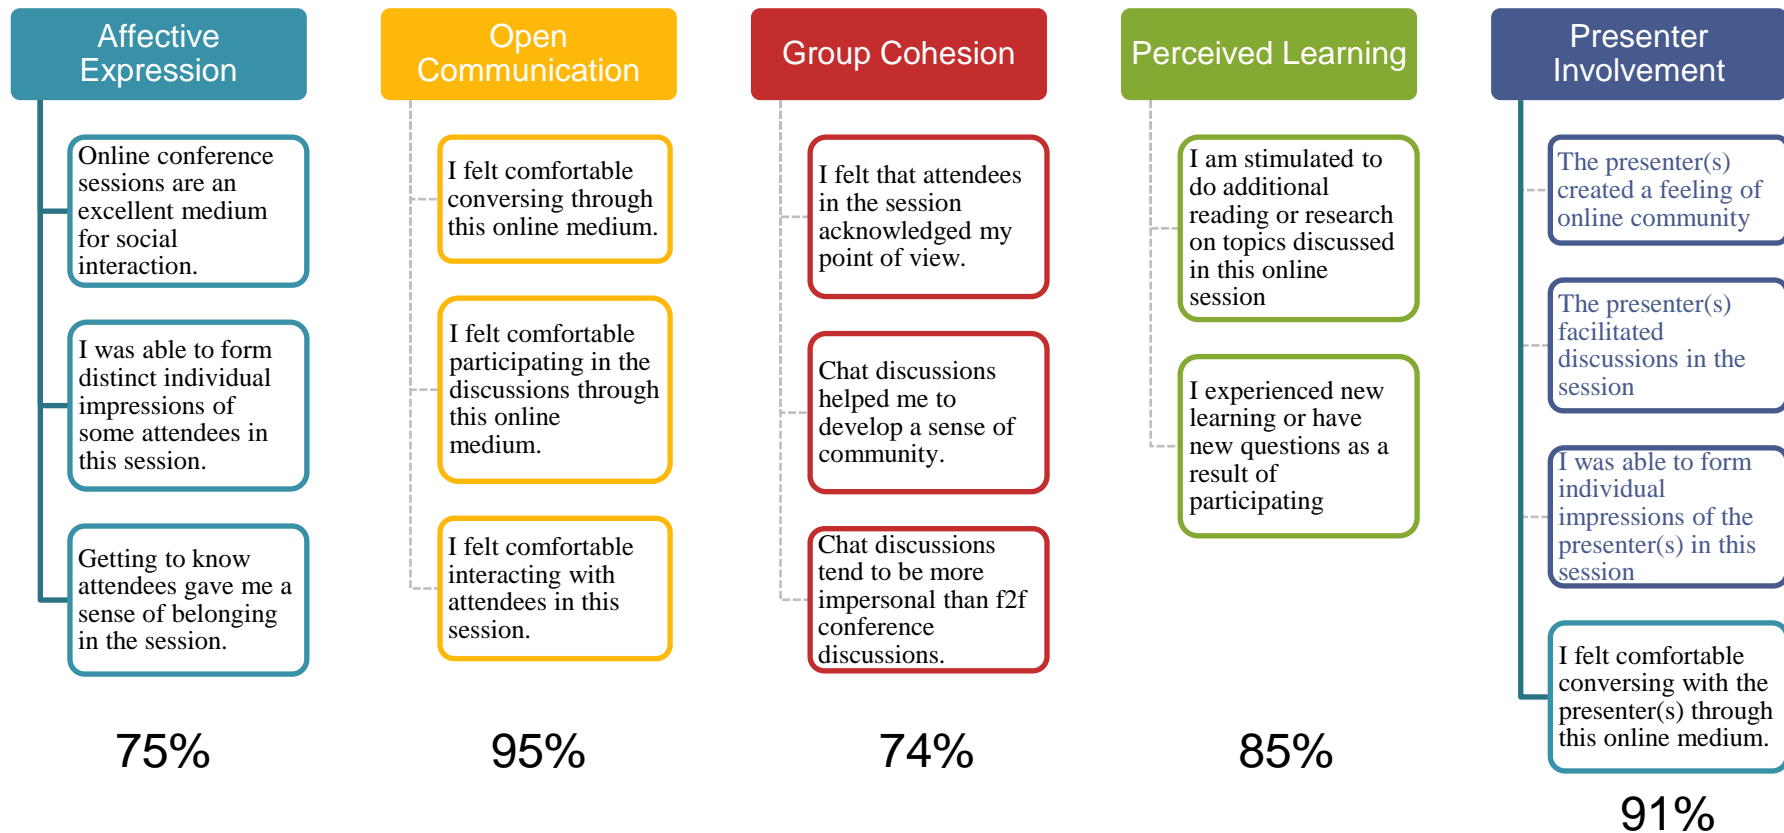

Questionnaire

Demographics

The majority of participants who participated in the survey represented first time TCC Conference attendees.

Questionnaire

Questionnaire

Satisfaction with the interaction
with other attendees in this session

82 %

A horizontal bar chart with a teal-colored segment representing 82% and a light gray segment representing the remaining 18%.

Satisfaction with your learning in
this session.

96 %

A horizontal bar chart with a light gray segment representing 96%.

Satisfaction with participating in
the chat discussions in this session

86 %

A horizontal bar chart with a light gray segment representing 86%.

Satisfaction with the presenter(s)
in this session.

100 %

A horizontal bar chart with a light gray segment representing 100%.

Questionnaire

Satisfaction with the interaction
with other attendees in this session

82 %

Satisfaction with your learning in
this session.

96 %

Satisfaction with participating in
the chat discussions in this session

86 %

Satisfaction with the presenter(s)
in this session.

100 %

Questionnaire

Satisfaction with the interaction
with other attendees in this session

82 %

A horizontal bar chart with a teal-colored segment representing 82% and a light gray segment representing the remaining 18%.

Satisfaction with your learning in
this session.

96 %

A horizontal bar chart with a yellow-colored segment representing 96% and a light gray segment representing the remaining 4%.

Satisfaction with participating in
the chat discussions in this session

86 %

A horizontal bar chart with a red-colored segment representing 86% and a light gray segment representing the remaining 14%.

Satisfaction with the presenter(s)
in this session.

100 %

A horizontal bar chart with a light gray segment representing 100%.

Questionnaire

Satisfaction with the interaction
with other attendees in this session

Satisfaction with your learning in
this session.

Satisfaction with participating in
the chat discussions in this session

Satisfaction with the presenter(s)
in this session.

Questionnaire

Attendees reporting higher perceived social presence in the session **also perceived they learned more from the session than attendees with low perceived social presence.**

Questionnaire

Attendees reporting higher perceived social presence in the session **also perceived a high level of presenter involvement in the session.**

Questionnaire

Attendees reporting higher perceived social presence in the session **also perceived a higher level of satisfaction.**

Research Question 3: How does social presence influence the conference experience of attendees and presenters in a professional online conference?

Interviews

Presenter Interviews

Presenter
presence

Interaction

Monitoring the
chat box

Online
community

Moderators

Presenter Interviews

Presenters described the need to create a sense of themselves as a 'real' person to the attendees.

Presenter Interviews

I think about how do we make someone, who's not in the same physical area of us, feel like we are near them, listening to them, talking to them, interacting with them, and maybe not as if we were specifically there, but maybe as if we were present in terms of sharing some collaborative space.

Presenter Interviews

Presenters described the need to ensure a high degree of interactivity and participation.

Presenter Interviews

And we also spread our presentation with opportunities for questions. And we tried to engage specifically with what some of the participants said... So we kind of circled back to some of the comments that were made. And even in this short presentation, it was only 20 minutes, we tried to have a bit of participation and connect to people by name, and personalizing a little bit that way.

Presenter Interviews

Presenters viewed their feedback to attendees as an important communication strategy.

Presenter Interviews

And now I see that we should have [monitored the chat box]. It's really hard to present and keep tabs on the chat at the same time...At one of the very worst conference presentations that I had ever attended, nobody paid any attention to the chat window. Nobody answered questions that we were posting, and they just dropped the ball across the board. Presenters need to be paying attention to the chat.

Attendee Interviews

Presenter
presence

Other
attendee
social
presence

Monitoring and
responding in
the chat box

Online
community

Own social
presence

Audio vs text
communication

Attendee Interviews

Attendees were conscious about how the content of their chat posts would reflect on their own presence

Attendee Interviews

I didn't want to appear elitist. I didn't want to appear to be a know it all. I like to have challenging discussions in the chat. I certainly wouldn't want to be perceived as squashing somebody else's ideas.

Attendee Interviews

Attendees spent time trying to interpret other attendees through their messages.

Attendee Interviews

When I see people type, or when I read their name, my mind kind of tends to drift to a certain imagination of what they may look like and be like.

Attendee Interviews

Attendees did not perceive the absence of vocal and verbal cues in the chat box to be an issue in creating their presence or perceiving others' presence.

Attendee Interviews

I am very comfortable to be in the chat and make my ideas clear and to understand what other people actually might mean when maybe their tone is a little bit off.

Implications

Within the confines of time typically faced by presenters in online conference sessions, both the presenter and attendees were able to manifest social presence in a short time frame.

Implications

Appreciation

Feedback

Implications

Practices for Online Presenters to Consider

Integrate quick social activities to establish connection and relationships before jumping into the content of the presentation.

Implications

Practices for Online Presenters to Consider

Integrate quick social activities to establish connection and relationships before jumping into the content of the presentation.

Provide interactivity within the presentation through questions or polls that invite learner participation.

Implications

Practices for Online Presenters to Consider

-  Integrate quick social activities to establish connection and relationships before jumping into the content of the presentation.
-  Provide interactivity within the presentation through questions or polls that invite learner participation.
-  Integrate one or two technology tools to enrich the session content.
- 
- 

Implications

-  Provide prompt and continuous feedback either verbally or in the chat box.
-  Use a tone of voice that is engaging, friendly, and positive to portray a positive sense of self.

Recommendations for Future Studies

How important are various indicators of presenter presence for attendees in a session?

What indicators of presence do participants consider to be most important in a session?

Does the type of presentation influence the type of presence manifested by presenters and attendees?

What influence does gender have on the conference dynamics?

Conclusion

We want to reaffirm that we are real people taking up space in the real world. Just as a selfie is how we want to be seen...

What about?

Have you considered ...

I had a similar experience

...social presence is how we want to be perceived online.

Great discussion

Could I contact you about that?

Last year at TCC...

thanks so much for that data
